Scrial No. 09/841,158

Please amend claims 4 and 8 as follows:

- 4. (Amended) An isolated nucleic acid molecule consisting of a nucleotide sequence selected from the group consisting of:
- (a) a nucleotide sequence that encodes a polypeptide comprising the amino acid sequence of SEQ ID NO:3;
 - (b) a nucleotide sequence consisting of SEQ ID NO:1;
 - (c) a nucleotide sequence consisting of SEQ ID NO:5; and
- (d) a nucleotide sequence that is completely complementary to a nucleotide sequence of (a)-(c).
- 8. (Amended) A nucleic acid vector comprising the nucleic acid molecule of claim 4.

Serial No. 09/841,158

Please add the following new claims 24-29:

- -24. A process for producing a polypeptide comprising culturing the host cell of claim 9 under conditions sufficient for the production of said polypeptide, and recovering said polypeptide.
- 25. An isolated polynucleotide consisting of the nucleotide sequence set forth in SEQ ID NO:1.
- 26. An isolated polynucleotide consisting of the nucleotide sequence set forth in SEQ ID NO:5.
- 27. A vector according to claim 8, wherein said vector is selected from the group consisting of a plasmid, a virus, and a bacteriophage.
- 28. A vector according to claim 8, wherein said isolated nucleic acid molecule is inserted into said vector in proper orientation and correct reading frame such that a polypeptide comprising SEQ ID NO:3 may be expressed by a cell transformed with said vector.
- 29. A vector according to claim 28, wherein said isolated nucleic acid molecule is operatively linked to a promoter sequence. --
